

Introduction

It is a matter of great satisfaction to all of us that Patent Gurukul has successfully completed 9 batches to date. The first batch received their Certificate on 23rd September 2006. Ever since, we have contributed to Patent Awareness and proficiency generation amongst industry and law professionals.

India is poised to emerge as the Intellectual Capital of the world, with its growing young and technically qualified human capital. The need of the hour is, however, to provide opportunity for learning knowledge management and more particularly Patent Laws and other forms of Intellectual properties. This will enable to enhance value-creation and value-extraction, which is essential for Asset-building and higher economic outcomes.

Transformation of India into a global competitive player has exposed our knowledge based industries towards new opportunities with innovation as a key ingredient of success and patent as a tool for value creation, market capture and dominance. These innovations (with inherent risks) require a convergence of law, science and management to constantly compete and act at par with rivals. This creates an urgent and increasing need of Patent -

professionals (engineers and scientists), patent analysts (for competitive and technological intelligence) and patent lawyers to scrutinize and mitigate the risks involved in these emerging sunrise industries.

Except in the field of Patents, India is reasonably well-placed in other forms of Intellectual property, both in proficiency as well as enforcement. In Patents, however, there is many a "Myth" and misinformation leading to inadequate exploitation of creative opportunities in research and innovation.

Patent Gurukul is a first of its kind endeavor to congregate law, science and management to unleash the patent realm providing the most awaited and much needed interface between industry and academia.

Patent Gurukul is headed by Dr. Gopakumar G. Nair, who has over 40 years industry experience and has overviewed and interacted during the Uruguay Round and the birth of WTO and TRIPs. Dr. Nair is registered Patent and trademark agent. We are ably supported by faculties and also by young and vibrant IP Lawyers.
